How you'll benefit from

Sky Muster™ Broadband

Fast Speeds

Sky Muster™ satellite capacity and usage is carefully policed by nbn™ and SkyMesh to ensure consistent, reliable, fast speeds for our customers.

Reliable Internet

There are no coverage black spots and the service is not reliant on old copper in the ground, unlike Dial-up or ADSL services. Once the service is installed, you have a reliable, fast internet service at your home.

Free Setup & Installation

Standard installations are FREE and there are no setup or activation fees. All you pay is your chosen monthly plan which start at just \$39.95 per month.

Award-Winning Plans

“SkyMesh is truly committed to connecting regional Australia to quality internet services and has always been a strong provider of satellite NBN plans.

Over the last 12 months, SkyMesh's satellite plans consistently offered consumers the best value and they are worthy winners of the Best Satellite NBN Provider award.”

WhistleOut Publisher, Joseph Hanlon

Trusted by 35,000+ Regional Homes Across Australia

Off-Grid Living

Chris and his sons, Fletcher and Flynn, explain what off-grid living is like and how the Sky Muster rural internet service, powered by SkyMesh, enables them to live off-grid while staying connected to the city.

Tasmania First Sky Muster User

Meet Chris Kisbee, who was the first Sky Muster service user in the whole of Tasmania. Both he and his wife are into gaming and have been happy Skymesh customers since 2009.

Why SkyMesh?

Fastest Growing Provider 2019

More Australians eligible for the Sky Muster satellite service have chosen SkyMesh in 2019 than any other provider. That says it all.

Australian Team

Speak to our Brisbane-based expert team who are on hands 7-days a week, even public holidays, not an overseas call centre.

No Lock-in Contracts

If you don't want to commit long term, you don't have to. You can always lock-in after a few months of using the service to benefit from larger anytime and off-peak data allowances at no extra cost.

BYO WiFi Router Friendly

Bring your own compatible WiFi router with basic SkyMesh support, or buy a new SkyMesh plug-n-play router for just \$134.99 complete with FREE shipping.

FREE School Holiday Data

During each school holiday, get some help keeping the kids busy with 10GB of anytime data on us.

Free Setup & Installation

No hidden connection, setup, activation, establishment, upgrading, termination, credit card or delivery fees.

Unlimited Plan Changes

Change your plan as often as you like without plan change fees. We'll just pro-rate the invoice from the date you request the change.

10+ Years Experience

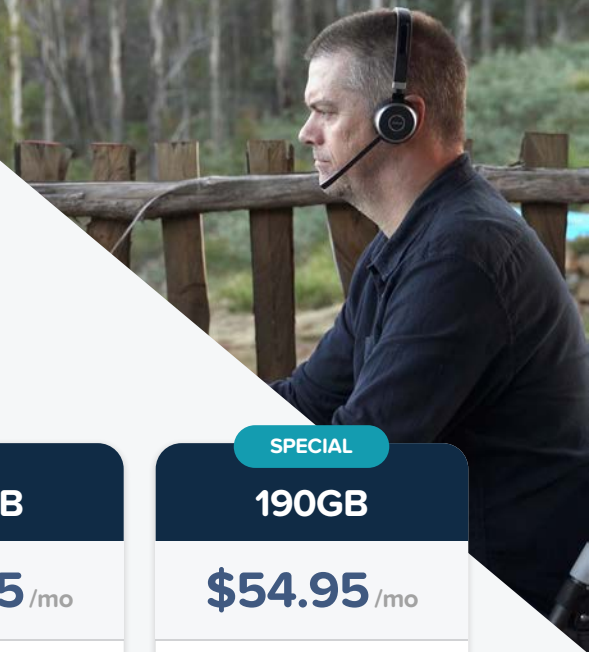

We've helped regional Australians access a better internet connection for well over a decade. From building our own wireless broadband networks to helping nbn™ commission some of their services.

Frequently Asked Questions

Where is Sky Muster available?

The Sky Muster internet service is nbn's two billion dollar connectivity commitment for those hard to reach remote locations. It's the perfect solution for country towns, islands, and the outback. In short, any regional location outside of major cities which has been allocated the service as part of the nbn rollout.

How does Satellite Internet Work?

Ten ground stations across Australia beam internet to two state-of-the-art-satellites out in space, which in turn, beam down connectivity to rural and remote homes that are connected to the service via an installed satellite dish.

What are the setup costs?

There are no hidden connection, setup, activation, credit card or delivery fees. Just pay for your chosen monthly plan and WiFi router (if you're not BYO).

What is the wait time for the installation?

Depending on your location, nbn™ aim to complete all standard installations within 20 business days of SkyMesh processing your order. Over 100,000 homes have now had the service installed.

Don't just take our word for it

Reliable rural service

It's reliable considering I can even get mobile phone coverage. SkyMesh customer service is exceptional. I would be totally lost without this kind of access due to living in a remote rural setting.

Thank you from farmers

SkyMesh Sky Muster has been a blessing for our family on our rural property. Appreciate the free holiday data, we're online 24/7! Thank you again from us farmers.

Rangmore – Reviewed October 2019

Country service satisfaction

Just wanted to affirm my complete satisfaction. All streaming services work very well. There's adequate speed, dependability, helpful/timely support, and the ability to easily change plans.
